Database Schema based on my ERD:

1. Authentication & Academic (External Dependencies)
These tables are typically managed by Authentication' modules but are essential for your Foreign Keys.

- user: Stores credentials and base roles.
- course: Stores college offerings (Fields: course_id, c_name, duration, level). (p. 1)

---

2. Brochure Phase
The entry point for any applicant.

- brochure_request: Captures the initial intent and course selection.
    - bro_id (PK)
    - user_id (FK)
    - course_id (FK)
    - bro_status (e.g., 'Pending', 'Payment Done')
    - created_at, updated_at (p. 1)
- bro_payment: Specific to the ₹200 fee.
    - payment_id (PK)
    - bro_id (FK)
    - amount (Constant: 200)
    - status, paid_at (p. 1)

---

3. Application & Details
Once the brochure is paid, this central entity is created.

- application: The "Heart" of your module.
    - app_id (PK)
    - user_id (FK)
    - bro_id (FK)
    - course_id (FK)
    - current_status (Current state of the app)
    - is_active, submission_date, admission_year (p. 1)
- applicant_details: Extended personal information.
    - applicant_id (PK)
    - app_id (FK)
    - full_name, dob, gender, blood_group, marital_status
    - adhar_no, nationality, address, caste_category
    - disability_status, scholarship_required, annual_income (p. 1)
- parent_details: Captures multiple parents/guardians for one application.
    - parent_id (PK), app_id (FK)
    - parent_type (Mother/Father/Guardian), name, occupation, email, mob_no (p. 1)
- education_details: History from 10th grade onwards.
    - edu_id (PK), app_id (FK)
    - qualification_level (10th, 12th, UG), institution_name, university_board
    - passout_year, percentage_result, stream, attempt_count (p. 1)

4.Fee payment of admission confirmation

- payment: For the final Admission Fee (pre-approval).
    - payment_id (PK), app_id (FK), amount, status, paid_at (p. 1)

---

5. Documents & Verification
- documents: Physical file tracking.
  - doc_id (PK), app_id (FK)
  - document_type (Caste, Marksheet, LC), file_path, file_type, file_size (p. 1)
- document_verification: Admin-side status per document.
  - verification_id (PK), document_id (FK), admin_id (FK)
  - status (Verified/Rejected), remarks (p. 1)

---

6. Status Tracking & Admin Review
- application_status_log: Your "State Machine" to track every change.
  - status_log_id (PK), app_id (FK)
  - changed_by (User ID), changed_role (Admin/Applicant)
  - status_id (FK to application_status), remark, changed_at (p. 1)
- admin_review: Records formal actions.
  - review_id (PK), app_id (FK), admin_id (FK)
  - action (Approve/Revision Required), remarks, timestamp (p. 1)

---

7. Finalization
- enrollment: The end of the lifecycle.
  - en_id (PK), app_id (FK), en_status, en_date (p. 1)

1.
2.
